

## Course Description:

This course will cover theoretical and practical activities designed to provide participants with the knowledge and skills to be able to recognise and control small workplace chemical spills.

## Course Content:

- Identification of Hazardous Materials Incident
- Evaluate and assess a spill incident
- Hazard Identification
- Types of Spill Response Equipment
- Types of PPE
- Control and containment of spills
- Clean Up and Decontamination
- Disposal of waste
- Incident Reporting

## Delivery Method:

Face to Face training will be conducted over a period of 2 hours.

Training can be conducted both on or offsite site provided access to a range of spill response equipment appropriate to the sites emergency plan and a suitable training room is available for use.

## Group Size:

To ensure quality training and a safe learning environment, the maximum allowable group size is 12 participants.

## What information will PARCOR require?

Due to training requirements, PARCOR will need to be provided with the following information prior to training commencement;

- Copy of chemical manifest on-site
- Copy of sample chemical risk assessment
- Copy of a MSDS relevant to site
- List of Spill Kit Contents

## What will your organisation receive?

- Certificate of Attendance for individual participants
- Certificate of Compliance for your Health and Safety Office compliance file
